MaterialOptimizator
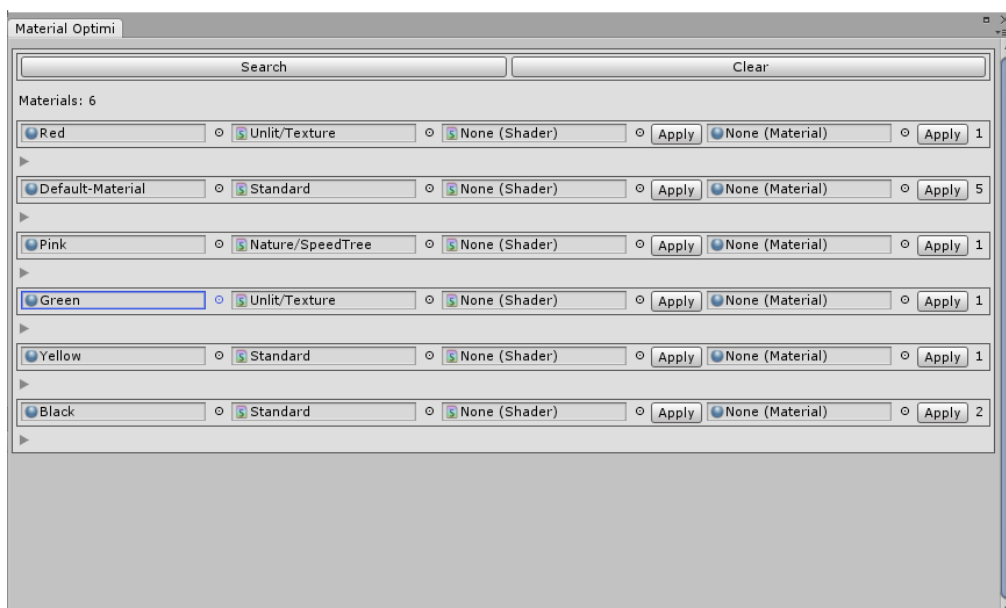

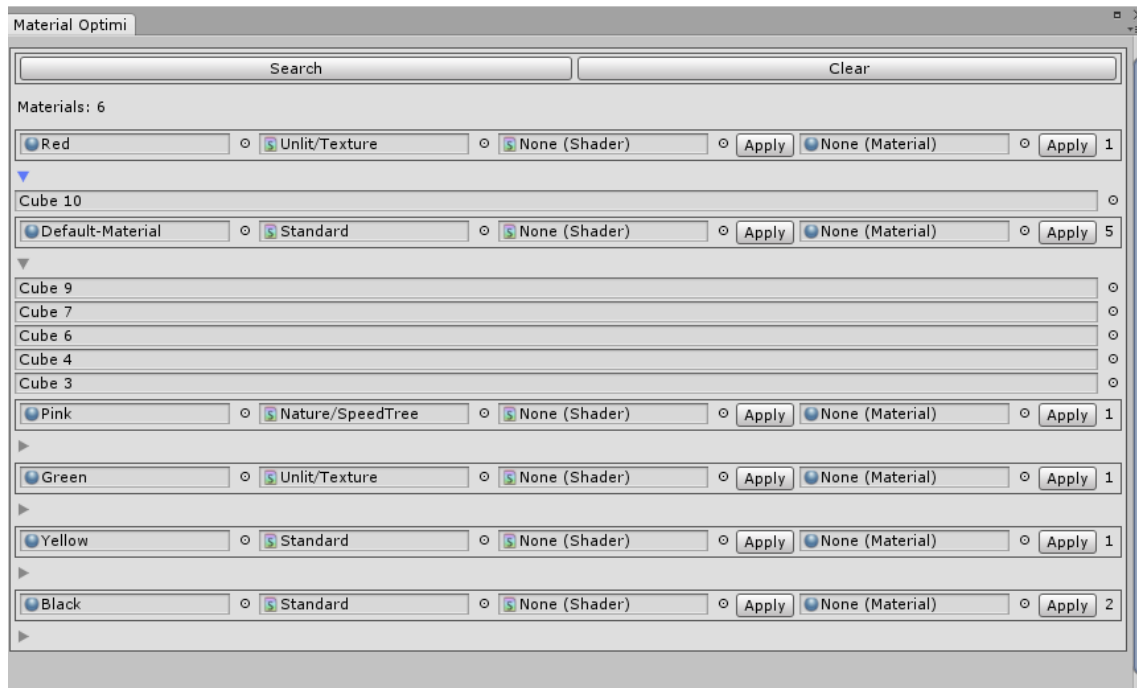

Thank you all for downloading this package. I hope you find it useful. This package will help you find and organize your materials efficiently. To use it, go to Window / FearlessFox / MaterialOptimizator. Once you open the window to search for the materials just click Search.

Once the search is complete, we can change both the material and the shader easily. We will only have to search the reference and press apply.

To obtain more information about the materials we can press the arrow under the material. This will show you all gameobjects that use this material

I hope you enjoy the package.
